

EN.AR.PLAN s.r.l. is an engineering and architectural firm that operates in the field of architectural, structural and systems engineering design, including aspects relating to occupational safety, the environment and interior design.

In the course of its activities, the firm relies on the exclusive collaboration of professionals specialized in various sectors and with long-standing expertise in their fields.

Mission: offering our customers comprehensive planning expertise through a successful inhouse professional organization.

Fields of activity

EN.AR.PLAN s.r.l., through the experience gained over time, is your ideal partner for feasibility studies, evaluations, consulting, coordination of works requiring complex technical and administrative organization, building/civil/industrial projects, studies for urban and road planning, construction site management and safety coordination. The firm can offer customers a complete range of services for the planning and execution of works in compliance with existing regulations, both in Italy and abroad, taking care of an entire project as a single partner while providing the necessary guarantees.

Specialized services

The firm provides specific technical advice to both companies and local government entities for the management of contracts, covering also issues relating to fire prevention and the compliance of special buildings such as theaters, public entertainment facilities and school buildings.
